Protocol # ___ as of «___» _____ 2019

1. EXPLANATORY NOTE

Titles	Branch of knowledge, Specialty, Education Degree	Nature of the academic subject
Full-time study	29 International Relations	Normative
Total amount of academic hours / Number of credits 120/4	029 International Relations, Public Communications and Regional Studies	Year of education: 1
Individual scientific research task : -	Bachelor	Semester: 2
		Lectures: 44 h.
		Seminars: 24 h.
		Independent work: 44 h.
		Consultations: 7 h.
		Form of control: <u>exam</u>

2. ANNOTATION OF THE ACADEMIC SUBJECT

The *aim* of the subject “International Economic Relations” is to study the basic forms and learn basic categories of international economic relations, to analyze trends in international economic relations, to investigate regulation methods and instruments of different forms of international economic activity at different levels (national, international, global).

The main *objectives* of the study of “International economic relations” are: to study features of formation and development of international economic relations; to understand basic forms, patterns and characteristics of international economic relations in modern conditions; to analyze the regulation system of international economic relations as well as to investigate the specific regulation mechanism of international economic relations; to characterize main features in regulation of various forms of international economic relations through international economic organizations.

3. COMPETENCIES

In accordance with the requirements of the educational and professional program students must

know: background, characteristics and trends of various forms of international economic relations (international trade, international capital flows, labor migration, international technology transfer); the essence of the basic concepts and categories of international economic relations; basic principles and instruments of international economic relations regulation; types and principles of foreign policy; features of the international commodity and trade agreements, the mechanism of monetary regulation; performance and effectiveness of various regulation tools in different forms of international economic relations;

manage to: apply the theoretical knowledge in practice, including: to analyze the background and process of international economic relations; to determine the content, forms and trends in international economic relations; to analyze the state of modern international economic relations, problems and prospects of their development; to summarize, draw conclusions and forecasts of international economic relations; to analyze the characteristics and effects of using different regulating instruments on the development of international economic relations; to study international economic statistics for practical purposes.

4. THE PROGRAMME OF THE ACADEMIC SUBJECT

CONTENT MODULE 1. THEORETICAL BASIS FOR STUDYING INTERNATIONAL ECONOMIC RELATIONS FORMS

Topic 1. International economic relations (IER) in the world economy.

The essence of IER. Objects and subjects of IER. Development factors and levels of IER. The world economy and International Division of Labor. Forms of IDL. The structure of the world economy. Key indicators of the global economy.

Topic 2. International trade relations.

The essence and causes of international trade. Indicators of IT. Forms and methods of modern international trade. International service market. Types of services. Features of service delivery.

Topic 3. International capital flows.

The essence of international capital flows. Capital markets. Forms of international capital movements. International credit and its basic types. The essence of investment. Direct and portfolio investments. Determinants of foreign direct investment. Trends in the international investments market.

Topic 4. International labor migration.

The causes and types of labor migration. Stages and directions of labor migration. Results of labor migration for importing and exporting countries. Current features of international migration. Modern centers of labor gravity.

Topic 5. International technology transfer.

Essence and forms of international technological exchange. Features of international technological exchange in the modern world. Types of license agreements, peculiarities of international license trade. Terms of the licensing conditions. The economic content of the patent. Features of the international market of engineering services.

Topic 6. International monetary and financial relations.

The global monetary and financial system, principles of its functioning, stages of development. The concept of currency and its types. The essence of exchange rates. Floating and fixed exchange rate. Essence and forms of international payments. Balance of payments, its nature and structure. Factors that affect the balance of payments.

Topic 7. International economic integration processes.

The concept, purpose and objective conditions of international economic integration. Stages of international economic integration. Features of the European integration process. NAFTA. Economic integration in Asia-Pacific (ASEAN, APEC) and the problems of integration processes in Africa. Problems of integration processes of Eastern Europe and former Soviet countries.

CONTENT MODULE 2. THE CONTENT AND STRUCTURE FOR REGULATING INTERNATIONAL ECONOMIC RELATIONS. REGULATION METHODS OF INTERNATIONAL TRADE RELATIONS.

Topic 8. Mechanism of International Economic Relations regulation.

The objective necessity of international economic relations regulation. Objects and subjects of regulation. Basic principles, tools and methods of regulation. Levels of regulation mechanism: national, international and supranational. Endogenous and exogenous regulation system of international economic relations. The process of establishing competitive balance in international markets.

Topic 9. The state as a regulator of international economic relations. Companies in the regulatory system of international economic relations.

Essence, objectives, factors and mechanism of foreign economic policy. The nature and methods of state influence on international economic relations. Structure of the modern system of

international economic relations regulation. Trade and political regulation. The main instruments of trade policy. Monetary methods of regulation. Informal barriers.

Firms as international economic relations regulators. Main forms of inter-firm regulation of international markets. The definition of a global company. Ethno, political and geocentric firm. Trade policy integration associations (for example, the European Union).

Topic 10. Tariff methods of regulating the international trade. The economic role of tariffs in small and large countries.

The essence and function of customs tariffs and duties. Main types of duties. Level of duties. Nominal and real level of duties. Optimal tariff. The essence of the tariff quota

The impact of the tariff on the economy of a small and big country. Two groups of economic effects - redistributive effects (effect of income and redistribution effect) and loss effects (effect of protection and effect of consumption). Arguments "for" and "against" tariff.

Topic 11. Regulation of world trade within the GATT / WTO.

Basic principles and rules of the WTO, its function in the control and liberalization of world trade. Mechanism of trade conferences. Main Rounds of negotiations. Mechanism of Trade Policy Review and practices of the countries - members. Principles and Practice of rate regulation in Ukraine.

Topic 12. Non-tariff methods of regulating international trade.

Nature and types of non-tariff regulation. Quantitative methods - quotas, licensing, voluntary export restraints. Types of quotas and licenses. The economic effect of import and export quotas. Financial methods of regulating trade. Grants, loans dumping. Trade agreements and legal regimes. Technical barriers, internal taxes and charges, public procurement, local content requirements for components.

Topic 13. International trade agreements in the system of international trade regulation.

Formation of international associations of manufacturers and exporters of certain products. The mechanism of functioning of trade agreements. Application distribution of quotas on production export of goods. Terms of cartel prices regulation in international markets. Examples of international commodity agreements. International trade agreements. Preferential agreements and free trade agreements. Examples of such agreements. The economic effects of trade agreements.

Topic 14. Restrictive business practices in international economic relations.

The essence of Restrictive Business Practices (RBP). Features of RBP: activity or behavior of enterprises; the presence of a dominant market position; restricting access to international markets competitors; various forms of agreements. Basic types of RBP. Forms for response RBP at national and international levels. Mechanisms to promote competition. UNCTAD and response RBP. WTO and draft agreements with the competition rules.

Topic 15. Regulation of international trade in services. The role of international organizations in creating conditions for the functioning of world service market.

Basic tools of regulation of trade in services. Regulation of market access. Restrictions on the use of national treatment. Quantitative import quotas for services. Restrictions on the establishment of branches of foreign companies, moving producers and consumers of services. Exceptions from national regime. Features of regulating international trade in certain services.

Activities undertaken by UNCTAD, OECD. Liberalization of the services market. General Agreement on Trade in Services; General Agreement on Financial Services.

CONTENT MODULE 3. REGULATION OF CERTAIN FORMS OF INTERNATIONAL ECONOMIC RELATIONS.

Topic 16. Content and structure of regulation of international capital flows. The nature of state regulation of capital flows. Bilateral and regional aspects of the regulation of capital movements.

The main subjects of regulation. Endogenous and exogenous mechanisms of regulation of capital flows. A market equilibrium in the external capital markets. Alignment of the marginal product of capital in global markets. The economic effects of direct investment.

The main sectors of regulation. Types of entry barriers on the capital market. Modes of foreign investment. Forms and methods of influence of TNCs on the mechanism of international capital flows. Major trends in the mechanism of regulation of international capital flows. Liberalization of foreign investment. Investment climate in the world. Systems for evaluating the attractiveness of national economies to foreign investors.

Basic model "entry and establishment." Agreement on mutual protection and promotion of foreign investment. Agreement on avoidance of double taxation. Principle of free movement of capital in the European Union. General Agreement on Investment (ASEAN, 1987), The Arab Investment Treaty (1981). Globalization regulation of international capital flows. Indicators of globalization. IMF globalization of capital flows. Activities of ECOSOC, UNCTAD and the United Nations Centre for multinationals in the promotion of international capital flows. World Bank and the regulation of international capital flows. The guidelines and scenarios of global negotiations on regulation of foreign investment.

Topic 17. Main types of regulation of international labor migration. Bilateral and multilateral agreements on labor migration.

Mechanisms of market regulation of international labor movement. The economic effects of migration. Factors modifying the market mechanism of international labor migration. State regulation of international migration. Emigration and immigration policy. Nation states and regional integration groupings means to regulate migration flows.

The internal and external aspects of migration management in the European Union and the United States. Schengen agreement. International Labour Organisation Convention on the problems of labor migration. Activities of the International Organization of Migration.

Topic 18. Regulation of intellectual property rights in the global economy.

Economic content and types of intellectual property. Features of intellectual property. Copyrights. Industrial property rights. The main mechanisms for protecting intellectual property rights. WTO Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS), its content and structure.

Topic 19. Fundamentals regulation of international integration processes.

The fields of regulation of economic relations in various stages of international integration. Value of independent, coordinated, collaborative and unified foreign policy. Regulation of economic activities within the European Union. Customs regulations, monetary integration, a single agricultural policy, policy on environmental protection, climate change prevention. Regulation of international economic relations in other integration associations: CIS, NAFTA, ASEAN, MERCOSUR, CARICOM. Fields and tendencies of global regulation mechanism.

6. POINTS THE STUDENTS GET

Module 1. Current control (max = 40 points)												Module 2. Module Control (max = 60 points)			Total
Content module 1			Content module 2					Content module 3							
T 1	T 2	T 3	T 4	T 5	T 6	T 7	T 8	T 9	T 10	T 11	T 12	MC 1	MC 2	MC 2	Exam
4	4	3	3	3	4	3	4	3	3	3	3	20	20	20	100

The criteria for estimation

Students performance at seminars are evaluated based on a set number of points. The final scores obtained at the seminar are determined and announced at the end of class, while taking into

account the level of students preparation, performance of certain tasks, additions and other students activities during the practical sessions. Implementation of individual research work is not provided. The total amount for the current control is 40.

It is obligatory to write a test (Module Control) after studying each content module. For each Module Control the student get some points as it is given in the table. The number of points for each task of module tests in case of their proper implementation are indicated in the test. The total maximum points for module control is 60.

The final evaluation of educational progress is *exam*. The maximum points for exam is 60. The student has to pass the exams only in that case, if he got less then 75 points during the study or if he is not satisfied with his mark. In that case, we do not take into account the points the student got for Module Control.

The total amount of points for the course is 100. The final mark is presented according to the evaluation scale (see the table).

Evaluation scale

The sum of points for all kinds of educational activity	Mark according to extended scale
90 – 100	Excellent
82 – 89	Very Good
75 - 81	Good
67 -74	Satisfactory
60 - 66	Enough
1 – 59	Unsatisfactory
