7. DISTRIBUTION OF SCORES AND CRITERIA OF EVALUATION

The discipline consists of one content module and its study doesn't involve the implementation of the ISRW. In this case, the final score on the 100-point scale consists of the total number of points for:

1. current evaluation of relevant topics (maximum 40 points);
2. modul control work – MCW (maximum 60 points).

Current control (max = 40 points)								Module control (max = 60 points)	Total amount of points
Module 1								Module 2	
Content Module 1								MCW	
T 1	T 2	T 3	T 4	T 5	T 6	T 7	T 8	60	100
5	5	5	5	5	5	5	5		

Students can get a certain amount of points from each of the topic of content module that are submitted to the seminar sessions. The total amount of points the student receives in response to seminars – 40. Thus, the total amount of points of current control is 40.

The number of points received at the seminar is determined and announced at the end of the lesson, taking into account the additions and other types of scientific and analytical activity of the student. After mastering each content module, written modular control work is envisaged. In tasks of modular works it is indicated, what amount of points can be set for each task, provided that it is executed correctly. The total score of modular control points is 60.

The final control takes place in the form of a test. The test is subject to the condition that the student fulfills all kinds of educational work, which is determined by the curriculum and received not less than 60 points. In case of unsatisfactory final evaluation, or if student wishes to increase the rating, the student can pick up the marks on the test by performing a certain type of work.

The total amount of points for the course is 100. The grade for the development of the course is set according to the scale of evaluation.

Evaluation scale

The sum of points for all kinds of educational activity	Mark
