EDUCATIONAL PROGRAMS OF INTERNATIONAL COOPERATION

This article emphasizes the role of education as a component of the innovation economy. It covers the key positions in cooperation of department of social pedagogy and higher education pedagogy of Eastern name after Lesya Ukrainka and foreign universities.

Education plays a crucial role for the purposes of innovative development. It is not only binding, but also constructive element in the three main components of the innovation economy "Science – Education – Production". In this combination educational potential acts both as a source of replenishment of brainpower and as a major factor acquisition of the workforce, the entire population of modern knowledge which is necessary for economic, social and cultural development of society through the use of advanced science, technology, innovations [2].

An essential element of this development is technology transfer, which is the transfer of scientific and technical knowledge and experience to provide scientific and technical services, their use for technological processes and production. The main types of technology transfer are: transfer of patents, engineering, transfer of "know-how", exchange of information through personal contacts (in seminars,

symposia and various exhibitions), research and development programs during the exchange of scholars and specialists, and organizing co-production [1].

Given the need to perform these tasks urgent issue is the preparation of relevant qualified social pedagogues-professionals, one of the main objectives of which is the adaptation of children and youth to changing conditions of social environment, consolidation of all forces and capabilities based on common goals and fulfillment of every personality.

Training of social pedagogues at the Department of Social Education and Pedagogic of Eastern European National University named after Lesya Ukrainka aimed at the needs of the western region of Ukraine in a highly professional specialists, mainly for Volhyn, Rivne, Lviv region.

To fulfil what we mentioned above Department of Social Education and Pedagogic of Eastern European National University named after Lesya Ukrainka closely work with foreign universities: Byelorussian State University named after A.S. Pushkin (Belarus), Graduate School of Management and Administration in Zamosc (Poland); State Higher Vocational School of Chelm (Poland), Institute of Social Prevention and Re-social development University of Warsaw (Poland), State Higher Vocational School named after of S. Tarnowska (Tarnobrzeg, Poland), University of Rzeszow (Poland), Zelenohurskyy University (Poland), Graduate School of International cooperation of ISM (Presiv, Slovakia), Catholic University (Poprad, Slovakia). International scientific conferences are held annually. Teachers of the department have practice of probation in foreign universities.

It should also be noted on the cooperation of Eastern European National University named after Lesya Ukrainka and Graduate School of Technology and Innovation (Lublin, Poland) under the program « Double Degree». In pedagogical direction in this higher school students can study in the following areas: school education and upbringing, education re-social development, therapeutic pedagogy of rehabilitation, school and pre-school education. Currently, we cooperate training students of specialty «Social Pedagogy» of Eastern European National University named after Lesya Ukrainka on the level «master degree» and «specialist» on speciality school pedagogy and education in Graduate School of Technology and Innovation and education of re-social development. Today it is consistent discipline that will re-credit to students and which students will learn in Eastern European National University named after Lesya Ukrainka. It is outlines the strategic directions of cooperation.

Therefore, It is expected that the cooperation of the department of social pedagogy and pedagogy of higher education with foreign universities will bring the system of training highly qualified specialists in line with market needs, enhance their ability to work effectively in the innovation economy.
